· Diameter : 0.35mm

### Triple Magnum

Thin-skinned eyebrows

- Easy to express delicate texture
- Delicate and natural expression
- Sharp but accurately expressed

# NEEDLE

## [ssomsatang]

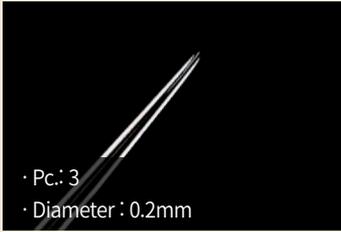

Microblading Needle     Korea Microshading Needle

Muse :

[PERMEATE] CEO\_HyeJin KANG

As the first official Korea microshading needle brand in Korea, it pursues the best quality that can satisfy beginners to top professionals, as well as a variety of personal Korea Microshading that satisfy the freedom of expression and tastes of operators as well as skin types with various configurations ranging from softness to rigidity.

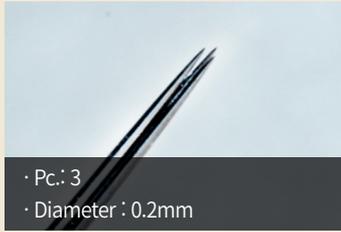

### 3RL Soft 0.2mm

Accurately target fine, narrow spaces

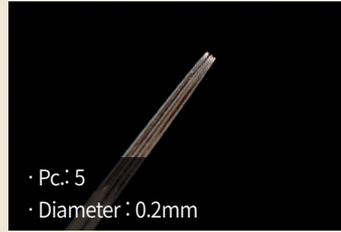

- Fragile or problematic skin, non-normal tissue area
- If you need to cover any marks or scars
- When you want a subtle and natural expression

### 3RL Semi-Hard 0.2mm

Ideal for FULL resin technique, combo technique

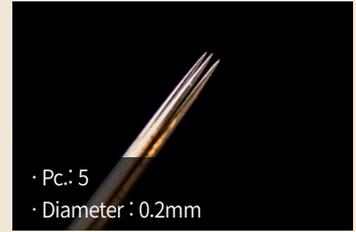

- Best sharpness & sophistication of resin needles
- Transparent resin work + When lightly shaping or replenishing density
- Powerful perforation even for tough skin

### 5RL Middle 0.2mm

Minimizing skin damage and clean lines

- Used when attacking narrow spaces accurately
- Skin concerned about bleeding due to thin epidermis
- When you want detailed contrast expression such as a grain of sand

### 5RS Middle 0.2mm

Preserve the texture of the skin texture and harmonize naturally

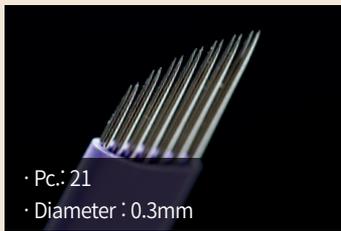

- Remove clumping and stains and express the surface evenly
- Naturalness that harmonizes with skin textures
- Irrespective of the concentration of pigments

### 7RS Middle 0.2mm

Preserve the texture of the skin texture and harmonize naturally

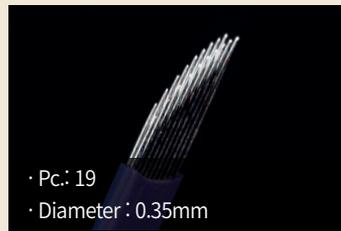

- If you want to express full touch with a round needle
- If you want to express a soft and subtle surface
- When you are worried about clumping and staining when using a round needle

### Single Magnum 21P

New type of magnum needle with excellent skin penetration

- If you are concerned about the marks peculiar to the arrangement of magnum needles
- If you want to finish the treatment with one needle
- When it was difficult to adjust the angle when using the magnum needle

### Dual Magnum 19P

Maximize smoothness and softness

- Sensitive, fragile or problem skin
- When you want to be natural from the day of the treatment
- If you need to cover any marks or scars

### Dual Magnum 27P

Light and transparent expression and excellent penetrating power

- When you want extremely soft expressive power
- Skin type that the existing magnum needles do not penetrate well
- When you want more elasticity than the existing magnum needle

# NEEDLE

## [De mignon]

Microblading Needle     Korea Microshading Needle

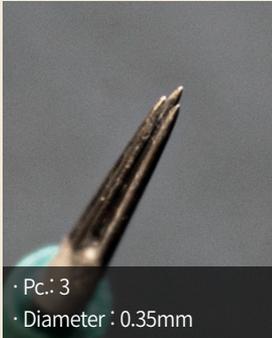

Muse :

[PERMEATE] CEO\_HaeJeong AN

In one word, we want to express it as 'first love.' The needle is optimized for korea microshading that are easy to use by anyone and can be expressed in different textures depending on their work skills. It is stably delivered to the skin and is expressed delicately and silky, and it is a chameleon-like product that allows constant touch and pigmentation to the skin in the form of soft curvature.

# NEEDLE

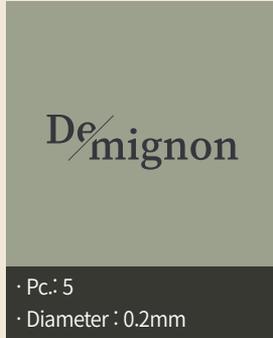

- Pc.: 3

## [ICE CREAM]

\* Safety certified 'suitable' pigment

Eye-brow Pigment    Lip Pigment    Eye-line Pigment

### POINT

**Excellent color development** | High coloring rate even with a light touch

**Easy to use**

Easy-to-use formulation that compensates for water-based thinness and the thickness of the neutral

**Neat touch**

Recommended for coverage of marks and first treatment and providing a clear thin line

True Black

# COLOR PIGMENT

[BELLA]

\* Safety certified 'suitable' pigment

Microblading Pigment     Korea Microshading Pigment

Muse :  
PERMEATE Co.,Ltd

'Bella,' which is expressed in a luxurious feeling that is not high in brightness and saturation, and is calm and heavy but softly smudged, is a warm color that harmonizes well with the original color. It is a neutral formula that is not watery but not stiff, and is sticky but not heavy, and it can be used stably and hygienically without changing the concentration until the last exhausted amount.

**Optimization of resin technique** | Excellent touch sensitivity and easy skin delivery with inorganic pigment base

**Soft mood** | Calm, heavy but softly smudged luxurious feel

**Unchanging concentration** | Same condition without separation until the last amount consumed

# COLOR PIGMENT

[MELT]

\* Safety certified 'suitable' pigment

Microblading Pigment

Korea Microshading Pigment

Muse :  
PERMEATE Co.,Ltd

Unlike the neutral line, the pearlmeate korea microshading-optimized pigment [MELT] maintains the translucency as if ink painting or watercolor paint was spread under the hair, and enhances the presence of the original hair.

The melting feeling, which is transparently colored with a classic mood and fills up with clarity, is an unrivaled charm that only the water-based pigment [MELT] can do. Relatively little loss of shape over time and unchanging holding power are also characteristics of this pigment.

**POINT**

**Unrivaled transparency** | Extreme naturalness and transparency that only water-based pigments can express

**Classic mood** | Naturalness that makes bare skin tone look more beautiful

**Unchanging retention power** | Pigment with relatively little loss of shape and no worry about discoloration

**1290**

# Medium Brown

**1750**

# Bright Brown

# COLOR PIGMENT

## [PLAT BROWN]

\* Safety certified 'suitable' pigment

Microblading Pigment     Korea Microshading Pigment

Muse :

[KIIARA] CEO\_SoA YOON

[Flat Brown], which boasts high injection power due to its fine and soft particles, freely adjusts the concentration regardless of skin type, and is an all-round pigment that is produced in various ways depending on mixing colors. The high lasting power that maintains the original color without discoloration is also an outstanding distinguishing feature of this pigment, and it is a Korea microshading pigment with fast implantation, high coloring, and longer retention.

## POINT

**Colorful color** | Various color spectrum depending on mixing colors and concentration

**Outstanding specifications** | Excellent color development, injection power, and lasting power with a soft and fine texture

**Used in all techniques** | Can be used in all techniques, including the most suitable korea microshading

# DIGITAL MACHINE & NEEDLE

It is a digital machine used for permanent makeup,  
enabling more sophisticated and faster treatments.

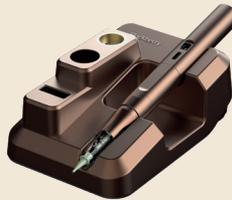

\*KC certified permanent makeup machine

# DIGITAL MACHINE

[Blackberry]

\* KC certified permanent makeup machine

Muse :

[Minnot Beauty Academy]  
CEO\_BoMin CHOI

The permanent makeup machine [Blackberry] was developed by analyzing machine users and treatment patterns, going through numerous tests, and focusing on performance, while also considering the elegant design like a fountain pen. It is an innovative permanent makeup machine that enhances the efficiency of the hand-piece as well as the slim body line and the auto functions installed in it.

## POINT

**All in 1** | It is composed of 1st to 6th stage, and all functions are installed in one handpiece, automatic on/off function

**Convenient wireless** | Equipped with a rechargeable battery, and no wire to connect to the handpiece

**Stable built-in motor** | Stable treatment is possible with a constant beating point and low vibration.

# DIGITAL MACHINE

[SOLEAD]

\* KC certified permanent makeup machine

Muse :

[Soi Art] CEO\_SuJi Kim

It was created through Korea's best machine gradation eyebrow treatment technician and long-term research and development. The solead machine with quiet and smooth operation provides excellent color injection by traversing the needle for the longest distance, and can be used wirelessly to minimize wrist damage, and it is a high-end machine with auto-SMP mode function to help with scalp tattoo SMP work.

## POINT

### All in 1 high-end machine

It consists of 1 to 12 layers, and can be treated by minimizing damage to weak skin such as eyebrows, eyeliner, and lips, and can inject colors accurately and quickly, such as tattoos and scalp tattoos.

### Convenient with wired/wireless dual use

It can be used in wired and wireless mode, and has a built-in battery that can be used for up to 3 hours (depending on output and treatment environment) when used wirelessly.

### Auto SMP mode function installed

SMP auto mode function enables fast and accurate scalp tattoo treatments.

### Built-in motor of the highest specification

It has a quiet but highest specification motor, and it is effective in shortening the treatment time because it enables quick color mixing by extending the needle crossing distance.
